A call was received from a member of the public who said that these puppies, with their mother, had just arrived in her garden. It seems that the mother, Minnie, carried each puppy down from the hills (about 1km) in turn and then, probably exhausted, took cover in someone's garden. The pups are mini-Podengos and were around 3 months old. This puppy is the male and his name is Zorro... he was adopted almost immediately by a family from Sweden, holidaying on the Algarve. After being vaccinated, his family returned to take him back to Sweden and here he is..... so completely relaxed that he's fallen asleep on his new Dad's shoulder.
